Acknowledgment. This book has been prepared based primarily on outcomes of the field surveys performed by the international collaborative project (1st phase: 2006–2011, 2nd phase: 2011–2016), entitled "Basic Study on the Aquatic Fauna and Flora and Conservation Activities Participated in by Local Residents in the Mekong-Chao Phraya Region," sponsored, organized and directed by the Nagao Natural Environment Foundation (NEF), Tokyo. This project would not have been possible without the help of all staff of universities/institutions involved in the project, and many local officers in respective countries (Lao PDR, Thailand, Cambodia, and Vietnam), as well as the NEF administrators. We also thank following persons, who helped identification of various kinds of the Mekong fishes: Kiyotaka Hatoaka (Osaka Museum of Natural History, Japan); Yusuke Hibino (Mie University, Japan); Hsuan-Ching Ho (National Museum of Marine Biology and Aquarium, Taiwan); Hisashi Imamura (Hokkaido University, Japan); Akihisa Iwata (Kyoto University, Japan); Yukio Iwatsuki (Miyazaki University, Japan); Zeehan Jaafer (National University of Singapore, Singapore); Seishi Kimura (Mie University, Japan); Hellen K. Larson (Museum and Art Gallery of the Northern Territory, Australia); Hiroyuki Motomura (Kagoshima University, Japan); Edward O. Murdy (George Washington University, USA); Heok Hee Ng (National University of Singapore, Singapore); Kunio Sasaki (Kochi University, Japan); Hiroshi Senou (Kanagawa Prefectural Museum, Japan); David G. Smith (National Museum of Natural History, USA). Following persons helped, and provided the working space and facilities for examining the fish specimens for our research: Hiroshi Kohno and Masato Moteki (Tokyo University of Marine Technology and Science, Japan); Keiichi Matsuura, Gento Shinohara, Takashi P. Sato, Masanori Nakae, Satoru N. Chiba, Eri Katayama, and Shinpei Ohashi (National Museum of Nature and Science, Japan); Douglass F. Hoese and Mark A. McGrouther (Australian Museum, Australia). Akihisa Iwata (Kyoto University, Japan), Masanori Nakae (National Museum of Nature and Science, Japan), Toshiyuki Suzuki (Kawanishi-midoridai Senior High School, Japan), and the Japan Wildlife Research Center (Japan) kindly provided fish photographs taken by them and/or permission for using photographs that they manage. Chavalit Vidthayanon (Mekong River Commission, Laos) gave his time for discussion with us about taxonomy and fauna of the Mekong fishes. Note that information about belonging places of these persons are those during the period of the project (to 2016).
