

2024 年度 フィールド調査 (2月1日から2月8日)

Fieldwork in 2024/2025 dry season from 1st to 8th February

乾季の湿地

The scenery of Malan Beel, where fishing cats were photo-captured, in the dry season

①食肉目の農地利用の調査

Sign survey and camera traps for middle sized carnivores in agricultural land

湿地内の田んぼに残った食肉目の足跡

Carnivore's footprints in paddy field in Hakaluki Haor wetland

村の青年によるスナドリネコのモニタリングの開始

Camera trap set by the youth leader of the nearest village where conflict with fishing cats has been reported. He will be responsible for monitoring camera.

人間の居住地と湿地における食肉目の利用の比較に向け、居住地にカメラの設置

Camera traps setting for comparison of carnivore's occurrence between human settlement area and inland wetland.

②小学校における環境教育の導入に向けたニーズ調査

パイロット調査に協力してくれた小学校

The primary school that kindly supports our pilot survey towards needs survey for place-based education around Hakaluki Haor.

小学校教師が生徒に教えたいたい事柄の聞き取り

Interview with teachers to integrate the needs from teachers and place-based education curriculum.

③Snapshot from the field

村でいただいた野菜

Very fresh cucumbers and beans that farmers offered us when we passed their gardens.
